EXPERIENCE

Studio KORSR.inc — *Full Stack Developer*

July 2022 - Jan 2025

– Implemented responsive web design principles to ensure applications are mobile-friendly across various devices.

– Developed and maintained custom web applications with React.

– Contributed ideas for improving development process efficiency.

– Managed both back-end and front-end aspects of the development process.

– Applied security best practices in application development to safeguard against common vulnerabilities.

– Resolved customer issues by establishing workarounds and solutions to debug and create defect fixes.

– Implement AI in daily tasks to increase development efficiency and redundant tasks

EDUCATION

Cégep de Trois-Rivières — *AEC*

OCT 2019 - JUN 2021

PROJECTS

Vehicles Inventory Management

- Designed and developed a full-stack inventory management application for multiple dealers.

- Improved operational efficiency by optimizing workflows and enhancing system performance.

SKILLS

– React

– NextJs

– Tailwind Css.

– NodeJs

– ExpressJs

– Rest API

– SQL

– NestJs

– MongoDb

– Docker

LANGUAGES

– French (Native)

– English (Fluent)

WHAT I'VE BUILT

– Notifications System

– Authentications (2FA)

– Websocket

– Queue Management

– Rest API

– Clean error handling

– Reusable Components

– Website scraper

– Database Architecture

Grenier - *grenier.qc.ca*

- Led the rebranding effort by implementing a pixel-perfect, fully responsive front-end based on Figma designs while working with the backend.

- Migrated the JavaScript codebase to TypeScript for improved maintainability and type safety while integrating with a PHP (Yii2) framework.

Chrono Aviation

- Developed and maintained custom applications to support aviation operations, improving efficiency and data management.

- Implemented new features to optimize workflows and enhance user experience.

Next Js/ Nest Js Boilerplate - *Korsr Studio inc.*

- Designed and developed a full-stack boilerplate to standardize development workflows and accelerate team productivity.

- Integrated best practices for scalability, performance, and maintainability in Next.js and NestJS.

Valetify - *Korsr Studio inc.*

- Developed a collaborative internal ticketing tool integrated with ClickUp to streamline task management and team coordination.

- Enhanced workflow efficiency by providing a seamless interface for tracking, assigning, and resolving tickets within the organization.

Click Plow - *click-plow.com*

- Built a simple and efficient web platform for on-demand snow removal services. Users enter their postal code and phone number to instantly book driveway snow clearing. Streamlined the user experience with a fast and intuitive interface.
